EDUCATION

SRM INSTITUTE OF SCIENCE AND TECHNOLOGY, KATTANKULATHUR

B.Tech
COMPUTER SCIENCE AND
ENGINEERING CORE

2024-2028

- 4th SEM GPA : 8.44
- CGPA : 8.0

VELAMMAL BODHI CAMPUS, CHENNAI

2022-2024

CLASS XII : 69.2%

THE PSBB MILLENNIUM SCHOOL, CHENNAI

2018-2022

CLASS X : 67.2%

SKILLS

LANGUAGES : ● C++ ● Java

- Database Management
- Backend Development

WEB :

- HTML ● CSS ● React

COURSE WORK

UNDERGRADUATE

LINEAR ALGEBRA
DATA STRUCTURES AND ALGORITHMS
OPERATING SYSTEMS
COMPUTER ORGANIZATION AND
ARCHITECTURE
INTERNET OF THINGS
ARTIFICIAL INTELLIGENCE
DESIGN AND ANALYSIS OF
ALGORITHMS
PROBABILITY AND QUEUEING THEORY

EXPERIENCE

KAASHIV INFOTECH

COMPUTER SCIENCE ENGINEERING INTERNSHIP

JUNE 2025 – JULY 2025

- Practical exposure to software development concepts and real-time project workflows.
- Worked on coding, debugging, and implementing basic application modules, strengthening problem-solving and programming skills.

AICTE- EDUSKILLS | VIRTUAL INTERNSHIP FOR 3 MONTHS

- Artificial Intelligence and Machine Learning by AWS Academy
- Cloud by AWS Academy
- Android Developer by Google for Developers
- Zero Trust Cloud Security by Zscaler

Exposure in the practical aspect through hands-on activities including basics of machine learning, cloud technologies, application development, and access management.

MADRAS INSTITUTE OF TECHNOLOGY

Internship in Industrial Robotics using KUKA Robots with 88% A+ Grade

- Building and testing robot programs from scratch
- Simulating complete robotic operations in KUKA.Sim 3.0.5

NEOLYNC

Internship in Network and Cloud Server in the Manufacturing Process

- Manufacturing Execution System (MES), PKI Servers, SAN Storage, Fibre Optic Networks, SNMP, Firewalls, Industrial Switches, Single-Mode Fibre, PuTTY,

COGNIFYZ TECHNOLOGIES

Data Science Intern | 1 month

- Data cleaning and explorations using Python & Pandas
- Exploratory Data Analysis (EDA)
- Statistical Analysis and interpretations
- Data visualizations using Matplotlib

MEMBERSHIP

INSTITUTION OF ENGINEERS OF INDIA (IEI), KOLKATA, INDIA

APRIL 2025 – PRESENT

CERTIFICATIONS AND ACHIEVEMENTS

HACKATHON 10.0

TOP 33 TEAMS

DEVELOPED AN AI-POWERED FULL-STACK HEALTH AND WELLNESS PLATFORM THAT UNIFIES MENTAL AND PHYSICAL HEALTH TRACKING THROUGH MOOD, SLEEP, ACTIVITY, HEART RATE, AND STEP MONITORING.

NPTEL :

- **FUNDAMENTALS OF OBJECT ORIENTED PROGRAMMING**
72/100
- **PROGRAMMING IN JAVA**
76/100

THALIR'25

TOP 20 TEAMS

AN IDEATHON PROMOTED TOWARDS ENTREPRENEURSHIP AND STARTUP IDEAS.

CO-CURRICULAR & EXTRAS

- **CREATIVE ASSOCIATE –**
AEGIX
- **CREATIVE TEAM MEMBER –**
FUTURIX, SRMIST.
- **Logistics & venue management –** MEA, SRMIST.
- **Storytelling**
- **Project Management**

PROJECTS

BUZZ – College Bus Tracking App

- A smart college bus tracking application to provide real-time live bus location tracking for students and staff.
- Integrated route mapping and bus stop visualization to help users easily identify boarding and drop points.
- Implemented location-based navigation support to guide users from their current position to the nearest bus stop.

HomeSecure Management – Client Project Assigned from College

- A property management web application designed to streamline property listings, service requests, contractor assignments, leases, payments, and maintenance workflows.
- Led database architecture and Supabase integration, designing the PostgreSQL schema, relationships, RLS policies, and backend data workflows for secure role-based access.

Heael – AI-Powered Health Companion

- AI-powered full-stack health and wellness platform that unifies mental and physical health tracking through mood, sleep, activity, heart rate, and step monitoring.
- Built a responsive web/mobile-friendly interface with real-time dashboards, wellness insights, and interactive UI components using React, HTML, CSS, and JavaScript.
- Implemented real-time health monitoring features including camera-based heart rate detection (PPG) and sensor-based step counting for live user wellness tracking.

SPAREV – SMART PARKING & EV CHARGING PLATFORM

- Full-stack web application that integrates smart parking reservation and EV charging management into a single platform for academic DBMS coursework. Built a responsive web/mobile-friendly interface with real-time dashboards, wellness insights, and interactive UI components using React, HTML, CSS, JavaScript, Vite, TypeScript, Node.js, Express, Prisma ORM, and MySQL with a structured database layer.

RESEARCH

UNDERGRADUATE RESEARCH OPPORTUNITIES PROGRAM

Zero-Trust Based Network Access Control for Campus IoT Devices | ZT-IoT-Guard

A faculty-supervised student research project where the system will identify IoT devices based on basic attributes and enforce access policies that determine which devices can communicate with specific services or networks. A policy framework defining permitted and restricted device communications and Logs and visual dashboards showing network access decisions.

Computer Organization and Architecture Survey Paper: Modern CPU Architecture | CPU vs. GPU

- Researched and presented a comparative survey on Intel and AMD modern CPU architectures
- Covered:
 - Instruction sets
 - Microarchitecture designs
 - Performance benchmarks
